O&Gmuster integrated at the Tempa Rossa project for our client TOTAL Italy !

Completed in 2014, Tempa Rossa project features our innovative solution for POB management

The contract includes the main part of the "Tempa Rossa oil field" development project located in proximity of Corleto Perticara in Potenza Province, Basilicata Region, Italy and also the central process facilities of the oil center where 50,000 barrels per day (BOPD) of crude oil are treated and stabilized and the treatment of the associated gas and water, the LPG storage center, the surface facilities on the well pads, the connections of the flowlines and pipelines with Snam Rete Gas and with Taranto Refinery pipeline.

For Ineo E&S PAU Branch Office, the project foresees the implementation of a O&Gmuster high availability with the Engineering, Procurement, Manufacture and On-Site Assistance of the oil and gas treatment "Tempa Rossa".
