- Securing the storage and archives of the air situation

AIRvoice HF inside

Adding new drivers for HF radios

AIRview - new monitors

New curve and touchscreen

Solutions Focus

ENGIE INEO - THE WORLD LEADER OF VSAT NETWORKS FOR ATM TELECOMMUNICATIONS

Egypt - NANS national ATM VSAT network

To cover the full Egyptian airspace, we deploy 22 VSAT stations and MW datalinks for ATM telecommunications including radar and AMHS information and voice communications.

ASECNA/AFISNET - Extension of ATM VSAT networks

After the deployment of more than 100 stations in Africa, we are continuing our efforts with the establishment of communication services between Africa and South America via a satellite network. The AFISNET VSAT stations of Cayenne and Piarco have been commissioned to modernize the communication medium between 3 FIRs. The Recife station (Recife-Dakar and Recife-Abidjan) in Brazil is currently being deployed.
